

Digital Resources

What are Digital Resources?

- They are Bibles, books, teachings, music, and video that you can read, listen to, or watch on your mobile phone!
- We have many important topics in Tok Pisin, English, and even some in Tok Ples that will help you grow as a Christian or leader.
- **How Do I Get Digital Resources?**
- We offer Digital Resources on Solar Powered Audio Players.
- On SD cards for Mobile phones
- WIFI Bible, a small Digital Resource Server for your Bible School, Church, or Ministry
- Or finally bring your SD card, or Mobile Phone to our office and ask!

Other Outreach Activities:

- Talks about the Good/Bad of technology including the dangers of pornography
- Jesus Film Ministry Night—We have a team that can bring a film kit that allows us to show the Jesus Film on a large screen for the whole community to be able to see.

**Discover how Technology can
bring POWER to your ministry!**

*CRMF is your partner to
make this happen*

Why Technology?

When God made the people of PNG, He made good storytellers and people who learn best by talking, listening, watching, and doing.

ANYONE with a little training can make good quality audio or video recordings that can bring the powerful stories of God right into the hands of people holding a mobile phone and listening to the talk or watching the video.

Maybe they are listening to a talking Bible or a talking book about how God wins over Sanguma.

Maybe Christian leaders are using WhatsApp and the internet to mentor and help younger leaders grow in their ministry.

Do you want to reach the 50% of PNG under the age of 21?

CRMF: provides consulting, training, and partnership to churches and ministries.

Let's Talk: We offer *FREE consultation services.*

We want to help you discover how technology can take your ministry to another level.

We can sit and talk with you about how technologies like smartphones, computers, solar power, Facebook, and WhatsApp can help YOU with: Evangelism, Discipleship, Pastor Training, looking after Money, Reaching Youth, and Mentoring Leaders

We can share the stories of our partnerships to help find the right solution for you!

Training

After you choose your technology and ministry goals, we can bring training to you. We suggest that you start with our Technology for Ministry workshop.

Technology for Ministry

In this week-long training we aim to **first** inform participants about current issues with technology, using technology as a strategic ministry tool, and the dangers like addictions to social media, video games, and pornography.

Secondly, by the end of the week participants will have gained many skills and used smartphones, tablets, and computers to create audio and video recordings and edit them. They will have created ministry projects such as evangelistic videos, leadership development multi-media materials, and a communication plan. Also, they will develop a plan for how their church and ministry can use technology.

We also offer a limited number of Basic Computer Training Courses for church and ministries staff who regularly use computers in their work.
